**Acer macrophyllum**

**Bigleaf maple**

**General:**
Native, Bigleaf maple is common in the Northwest, is a large [height: 60-80 feet (18-24m), widths 60-70 feet (18-21m)] handsome, deciduous tree. The sap can be made into maple syrup. Has medicinal properties

**Problems:**
On a small property, this tree would overwhelm. Not suitable as a street tree, near foundations or concrete surfaces, as its root system would destroy any surface close by.

**Requirements:**
- Full Sun
- Regular water
