**Achillea millefolium**  
**Western yarrow**

**General:**  
Massed planting will provide a variety of pastel flower shades. Green leaves are fern-like and aromatic when crushed. Tolerant of heat and humidity, flowers colors may fade in extended, hot summer weather. Drought tolerant once established.

**Problems:**  
Powdery mildew and stem rot are infrequent problems. Does poorly in wet sites or heavy, poorly drained soils.

**Uses:**  
An excellent perennial for massing in a border, wild garden or meadow.

- full sun  
- little to moderate water  
- attracts butterflies
