**Ceanothus thyrsiflorus**

**Blue blossom ceanothus**

Moderately fast growing dense shrub or small tree up to 18’ tall and wide.
Shiny evergreen leaves. Showy blossoms in the spring that have a sweet honey-like fragrance.
Flowers can be white, light blue, dark blue or purple depending on the cultivar. Will do best in afternoon shade in Redding area.
Frost tender. Tolerates poor soil conditions with good drainage. Important food source for birds and insects.

- Afternoon shade
- Monthly water once established
- Attracts butterflies
- Attracts birds
- Attracts hummingbirds
