**Comarostaphylis diversifolia**

**Summer holly**

Slow growing upright shrub to 20'. Evergreen, shiny green foliage. Showy white, urn-shaped flowers in the spring. Edible red berries. Only requires once a month deep watering in summer after it is established. Tolerates clay but does best in well-draining, rocky soil. Tolerates drought.

- Best with afternoon shade
- Drought tolerant once established
- Attracts hummingbirds
- Attracts birds

Attracts birds
