Monardella villosa

Coyote mint

Moderately fast growing perennial herb forms a small bush that gets 2’ tall and wide.
Evergreen, summer semi-deciduous. Lavender flowers in the spring and summer.
Cold hardy to 15° F.
Water requirements vary depending on soil conditions and area planted.
Does best with good drainage.
Spreads by underground rhizomes and seeds.
Fragrant grey-green leaves can be steeped into a mint tea.
Tolerates sand, clay and serpentine soil.
Great for a butterfly garden.
