Calocedrus decurrens

Incense-cedar

**General:**
Large conical-shaped tree has dark green flattened sprays of evergreen scale-like leaves. Notable for its aromatic, scale-leaves that form pendulous branches that droop in sprays. Miniature urn-shaped cones, and exfoliating cinnamon-colored bark

75-90ft. tall X 10-15ft. wide

Slow growing until established, but then fast growing.

Tolerates hot temperature and poor soil.

Drought resistant
