Ceanothus ‘dark star’

‘Dark star’ California lilac

Evergreen shrub to 6’ H x 8’ W. Dense glossy foliage of small silvery green leaves. Fragrant cobalt blue flowers March-May. Handles pruning well. Does good as a hedge plant, small screen, or can be trained as a small tree. Tolerates full to part sun. Tolerates clay and sandy soil. Water monthly after established. Attracts birds, hummingbirds, and butterflies. Flowers are fragrant.
