**Festuca idahoensis**

**Idaho fescue**

Perennial grass, good for erosion control. Grows to 2’ x 2’, mow high after it seeds to keep it looking fresh. Remove seed heads to prevent spreading. Drought tolerant once it’s established. Plant in full sun to part shade. Prefers well draining soil. Attracts birds and butterflies.

- Full sun to part shade
- Low water once established
- Attracts birds
- Attracts butterflies
