Quercus wislizenii

Interior live oak

General:
Evergreen tree, 30-75’ often wider than high. Wide spreading branches for dense crown. Oblong, glossy green, smooth or spiny edged leaves to 4” long. Handsome tree for parks and big lawns. Sparse, angular young plants fail to hit at trees’ ultimate beauty. Requires protection from strong western sun as a young tree as bark will sunburn and die.

- Full sun
- No water once established
