Salvia clevelandii

Cleveland sage

General:
Moderately fast growing mounding shrub to 4’ high and 6’ wide. Semi-evergreen. Takes full to part sun. Best in well drained soil. Foliage is silvery green and if over watered the foliage may turn more green than silver. Showy purple flowers in whorls on woody stems in late spring to early summer. Flowers and foliage are very fragrant. Drought tolerant once established.

- full to part sun
- drought tolerant
- attracts hummingbirds
- attracts birds
- attracts butterflies
